

International Management & Business Consultants

Healthcare:

Institutional Procurement and Distribution

GIC has an established track record of working on healthcare procurement and distribution projects in developing countries. Our staff work closely with IFIs, NGOs and governments to improve the efficiency of procurement, storage and distribution of medical equipment and supplies, in providing advice on supply logistics for health commodities, preparing supply logistics handbooks for field health workers, and appraising the options for outsourcing services.

We offer the following services:

- Advice on purchasing procurement management and financing
- Design, monitoring of supply logistics systems
- Evaluation of supply logistics systems
- Design and management of supply programmes
- Training and mentoring of healthcare staff
- Problems analysis and troubleshooting

All our services are offered through practical, hands-on assistance to meet the specific requirements of our clients.

For more information on how we can support you on procurement and distribution issues please contact us.

Some samples of our work can be accessed in our case studies section.
