

International Management & Business Consultants

Healthcare:

Options assessments

GIC has specialist experience in assessing options in health sector provision. We have worked worldwide on assignments relating to the application of pharmaceuticals and medicines (including essential medicines) and medical devices and equipment in the delivery of preventive and curative healthcare services from primary-level services in rural areas to tertiary hospital-based care. Our services include:

- Studies and research on prevention strategies and treatment costs
- Evaluating medicines and equipment selection options
- Advice on the procurement, storage and distribution of medical supplies and pharmaceuticals
- Health Economics studies of cost effectiveness
- Systems analysis and implementation
- Operations research
- Organisational development
- Strategies for Education and Training

For more information on how we can support you on healthcare technology issues please contact us.
